**Re Item V**

**Reasoned statement with regard to novelty, inventive step or industrial applicability;  
citations and explanations supporting such statement**

Reference is made to the following document:

D1: US-B1-6 370 605 (CHONG, JR. FAY) 9 April 2002 (2002-04-09)

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of the independent claims 12 and 16 is not new in the sense of Article 33(2) PCT.

**Claim 12**

The document D1 discloses (the references in parentheses applying to this document): A fibre channel switch element, comprising: a port with an address mapping cache that receives an incoming fibre channel frame in a receive and/or transmit segment, wherein the address mapping cache (see figure 4A) compares a D\_ID of an incoming frame in the receive segment and/or a S\_ID in the transmit segment; and if a frame header is received the a D\_ID or S\_ID is compared from a fibre channel header that follows the frame header; and if a compare fabric identifier flag is set, then the fabric identifier is compared (see column 23 line 59-column 24 line 15).

**Claim 16**

Document D1 discloses

A fibre channel switch element comprising: a port with an address mapping cache that is used for routing frames from one virtual fabric to another by comparing a field in the header to a Virtual fabric identifier in a Header (see column 23 line 59-column 24 line 15).

Dependent claims 13-15 and 17 are also not new because the additional features described in these claims are also already disclosed by D1.
